NSA- Listed Hard Drive Destroyer

PD-4 NSA-Listed Destroyer

The NSA-listed PD-4 physically destroys hard drives by bending, breaking, and mangling the hard drive and its internal components including the data platters. Using a rugged, stainless-steel crushing wedge, the PD-4 bends the data platters, preventing the hard drive from “spinning up” or for the hard disk platters from being removed and placed on a spin stand used in laboratory data recovery techniques. The PD-4 also cracks the hard-drive housing, breaks the PC board, and smashes the read-write heads. Best for use after degaussing, the PD-4 ensures total hard drive destruction.

Secure and Compliant

The PD-4 will help you satisfy the most stringent government and industry standards, including:

- California Senate Bill 1386
- DOD Emergency Destruction Guidelines
- FCC
- GDPR (General Data Protection Regulation)
- GLBA (Gramm-Leach-Bliley Act)
- HIPAA (Health Information Portability and Accountability Act)
- NIST SP 800-88r1
- NSA SDDM 9-12
- PCI DSS 3.2 (Payment Card Industry Data Security Standard)
- PIPEDA (Personal Information Protection and Electronic Documents Act)

International Standards

Independently tested and certified to meet CE safety, compatibility, and interference standards.

PD-4 Features

- Listed on NSA Evaluated Products List
- 5+ tons of force bends, breaks, and mangles hard drives, including data platters and other internal components, preventing data recover
- Destroys up to 1,440 (2.5 in.) and 240 (3.5 in.) hard drives per hour
- Total destruction in less than 28 seconds
- Crushes multiple drives at a time
- Quiet, office friendly design
- No hydraulics
- CE certified

Bends, breaks, and mangles hard drives.
